

TACCA

Plastics Australia Pty Ltd

quality that's visible

GLOBAL SOURCING

Whilst the majority of Tacca Plastics products are manufactured in Australia at its Moorebank facility a number of products are imported.

In its quest to meet the needs of all its customers Tacca Plastics identified that not all of these needs could be met by its manufacturing plant in Sydney. With this in mind Tacca Plastics embarked on a worldwide quest to identify and source suitable packaging that would compliment its vast range of products both satisfying customer's needs and meeting a quality standard equal to that at its Moorebank plant.

A number of strategic relationships have been forged with a group of overseas manufacturers which have enabled Tacca Plastics to expand its range of products and strengthened the scope of custom supply options.
